

Heavy Duty Digging Bucket with Spade Teeth for Direct Mount or Pin Grabber Coupler

Conquer the toughest excavation challenges with the Viking West Heavy Duty Digging Bucket, featuring **ESCO Ultralok Tooth System and Spade Teeth** for ultimate digging reliability and serviceability. Designed for both direct mount and pin grabber couplers, this bucket combines high-strength, wear-resistant steel with an efficient compound-curved and tapered shell to maximize durability and minimize digging resistance.

KEY FEATURES

Certitified Lifting Point

Compatible with various rigging accessories and lifting methods, including chains, cables, or slings.

Induction Hardened Pins

Bucket includes OEM quality high strength induction hardened pins and locking hardware.

KEY FEATURES

Wear Resistant Steel

Extensive use of High Strength Wear Resistant HB400 steel for Side Cutters, Cheek Plates, Lip and Wear Bars.

KEY FEATURES

Compound Curved Shell

Enhances performance and longevity by improving material flow in and out of the bucket and providing a more efficient angle for digging and penetrating tough materials, requiring less energy and improving fuel efficiency.

ESCO Ultralok Tooth System

Heavy Duty Dig Buckets with Flare Teeth come standard with ESCO Ultralok tooth system.

Pre Drilled for Cat Style Sidecutters

Heavy duty pin-on dig buckets are pre drilled for Cat style bolt-on side cutters.
